DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose the following recited limitations "wherein the evaluation logic is arranged on a side of the electrical isolation element towards the at least one input-side terminal, and wherein the evaluation logic is supplied with voltage by the at least one input-side signal terminal" (claim 1); "an evaluation logic for the processing of signals present at the at least one input-side terminal and for the generation of output-side signals for the control of the lamp operating device wherein the evaluation logic has a voltage supply independent of a mains voltage supply of the lamp operating device" (claim 9); "transmission of the processed control signals by means of an electrical isolation element to the lamp operating device, wherein a voltage supply for the processing of the signals present at the input-side terminal and for the generation of the output-side signals for the control of the lamp operating device is effected via the at least one input-side signal terminal" (claim 12). The remaining claims 2-8, 10, 11 and 13-18 are allowed by virtue of their dependencies from the independent claims. Hence, the examiner has allowed claims 1 through 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
